Small Nations Asserting Themselves in Meeting of the League Assembly.

HYMANS ELECTED PRESIDENT

Early Admission of Germany Seems Likely - Soviet Russia, Having Crushed Wrangel, Is in Strong Position- Greeks May Restore Constantine to Throne,

By EDWARD W. PICKARD. sooner had the assembly of the League of Nations got down to businees in its first meeting in Geneva than signs of discord between the groups of large and small nations appeared. Up to date the latter have the better of the argument, and the fears of persons who thought the doings of the league would be dominated by Great Britain, France, Italy and perhaps Japan are somewhat allayed. Indeed, the representatives of those four nations were by no means in acthemselves in opposition to French propositions, and the various British deminions did not agree with the mother country.

A most interesting development of the week was the announcement that Spain would join with Great Britain, France and Belgium in policing the Vilna zone during the plebiscite This was looked on as possibly the beginning of the organization of a

The first day, after the election of Paul Hymans of Belgium as president saw the opening scrap over the nutter of admitting Germany to membership in the league. The French had objected that this subject did not appear on the agenda, but Tittoni of Italy declared the whole world demanded the admission of the enemy states and would not accept the excase that their applications had not been received in time. Sir Robert Cecil, who represented South Africa, appeared to side with Tittont.

It was decided that six commissions should handle the work of the assembly. The first is to take care of general organization; the second technical organization; the third the international court of justice; the fourth finance; the fifth admission of new members, and the sixth reduction of armaments, blockade and military pressure on covenant breaking states and man-

When these commissions were named, on Wednesday, the supporters of the immediate admission of Germany scored another victory in the election of Delegate Huneus of Chile president of commission number 5; Doctor Blanco of Cuba was made vice president. The French were surprised and chagrined at not receiving this presidency for Viviani, but they had been already put at a disadvantage by the naming of Bourgeois as head of the third commission. It had been supposed that Great Britain, because of her naval power, would get presidency of the commission dealing with disarmament and blockade of covenant breaking states and with ndates, but here again the smaller nations showed their independence by giving the place to Delegate Branting of Sweden. The French, Italian and English delegations won a point Tuesday when it was decided that the commissions might, if they wished, sit in camera and need keep no minutes of their sessions. Cecil protested in vain against this.

Delegate Puyrredon of the Argentine told the assembly that his delegation believed all recognized nations must belong to the league to make it. effective and to avoid the danger of the organization of a rival league. He said that a formula must be found to permit the United States to come in. and demanded that the league be made more democratic by electing all the members of the council in the assembly, instead of allowing the big powers to name a majority of them, as at present.

An interesting story from Munich sets forth the imminence of a new revindependent state of that second largand the creation of a regency, probably to be followed by the selection of one of the Wittelsbach family as king.

It is planned, also, that Bavaria shall enter into an agreement with France to guarantee her independence and obtain relief from her part of the German war burden. The story, which is plausible, says the real ruler of Bavaria is Doctor Escherich, founder of the Bavarian home militia, whose armed strength is about 100,000; that he is backed by the former German staff officers and monarchists, chief of whom is General Ludendorff, and that Ludendorff probably would be chosen regent. Escherich has refused to disarm his militia, and it is expected the entente will soon threaten to occupy this is done, according to the plot, the workers, socialists and communists will declare a general strike and in the

men't finds itself in good shape to resume negotiations for the resumption of trade with other nations. And its chances for recognition also are vastly improved. Most governments realized some time ago that Russian Bolshevism was not to be destroyed by armed opposition, especially from the outside; and nearly all except France be lieved that it would be useless to give aid to the factions within Russia that were in rebellion against Lenine and Trotzky. Even the leaders of the Menshivists and other wise opponents of Bolshevism in Russia have long maintained that position and asserted that the best thing to do was to recognize the Moscow government, or at least let it alone, and that ultimately, having nothing to fight, Bolshevisn must fall. It seems likely that this view of the problem will now become

general. The crushing of Wrangel was swift once the Bolsheviki had broken through his defenses on the Perekop eninsula. His troops were driven ack to Sebastopol and some 20,000 of them, together with many thousands of civillan refugees, embarked there and other ports. Wrangel also escaped to

the Turkish capital. The soviet forces were then directed rout, Klev and other cities being occu- lar. pled by the Reds. There was fear in the capitals of Europe that the Russlans would now renew the fight against the Poles, and certain threatening notes from Moscow to Warsaw increased the apprehension.

The Turkish nationalists have designated soviet Russia as the "warden of the Orient," according to Talaat Pasha, former vizier, and consider the treaty between Turkey and the allies invalid. With the help of the nationalists, the Russians are strengthening their hold on the country between the Black and Caspian seas, demanding more and more from the Georgians and the Armenians, and opening more completely their route to Persia, and Mesopotamia, and perhaps to India. The British have decided not to reduce their military establishment in Mesopotamia for the present.

The Kansas industrial court, which has been so bitterly attacked by organized labor, showed the other of its two edges last week when it called before it representatives of all flour milis in Topeka. Workmen had complained to the court that some of the mills had closed down and others were on part time, and the court wanted to know why, since such a thing cannot be done without court sanction where a neces-

The best part of out prepayment of tolls, but also has it all is the way it takes hold of a cough. The first dose relieves. It makes you breathe deep and easy. It tastes well and can be given to very young children. No home can afford to be without this cough medicine on hand. Stop your cough before it gets a hold on you. Ask your druggist for a three oz. bottle of Glando Pine and don't allow a substitute forced upon you. Prepare it according to directions and you will have a family supply of the best cough remedy you ever used. If it does not please you your money will be refunded.
